Art Unit: 1645

DETAILED ACTION

1. Applicant's Response to Office Action, received 17February2004, is acknowledged.
2. Claims 1-34 are pending and under consideration.

Rejections Withdrawn

3. The rejection of claims 25-27 and 29-34 under 35 U.S.C. 112, second paragraph, as being indefinite for "a pair of antibodies specific to PrP^{SC}", is withdrawn in light of applicant's argument.

Rejections Maintained

4. The rejection of claims 1-24 and 28 under 35 U.S.C. 112, second paragraph, as being indefinite for "a pair of antibodies specific to PrP^{SC}", is maintained for reasons of record.

Applicant argues that the language is quite clear that the present invention utilizes two different antibodies based upon language in the specification.

The examine has considered applicant's argument, but does not find it persuasive. While the specification may teach the embodiments contained in applicant's argument, the claims do not contain the criticalities of these embodiments. The claims do not limit the definition of "a pair of antibodies specific to PrP^{SC}" to that which is in the specification. Thus, it remains indefinite if the claims are drawn solely to one antibody which is utilized two times or if two separate antibodies are being claimed.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1645

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 25-27, and 29-32 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: how one assays for only PrP^{Sc} by using an immunochromatographic technique when there are no discriminating elements, e.g., antibodies specific to PrP^{Sc} being utilized.

8. Claim 32 is rejected under 35 U.S.C. 112, second paragraph, insufficient antecedent basis, because the claim recites the limitation "The method of claim 25 wherein the labeled antibody has a colored label.". Claim 25 does not recite "labeled antibody".

Conclusion

9. No claims are allowed.
